FOR IMMEDIATE RELEASE

ProComSol Instrumentation Scholarship Winner Announced

LAKEWOOD, Ohio USA – August 31, 2021 – ProComSol, Ltd (www.procomsol.com) today announced the winner of the 2021 ProComSol Instrumentation Scholarship Program. This year's winner is Jaxon Few of Oklahoma. According to Jeffrey Dobos, President of ProComSol, Ltd, "We received a record number of applicants this year. Jaxon's essay stood out from the rest and it was an easy decision for the scholarship committee. I wish Jaxon success in his Instrumentation studies and with his future career in the process industry."

Jaxon grew up in a small town in southeastern Oklahoma. He was raised on a small cattle ranch where his family raises and sells cattle. In high school he participated in sports and FFA (Future Farmers of America). He is currently enrolled in the Instrumentation program at Oklahoma State University Institute of Technology and looks forward to a rewarding career in instrumentation.

We are already making plans for the 2022 scholarship program and encourage colleges and universities to promote this program to their students. Contact us for promotional materials and other help reaching your students.

ProComSol intends to continue and grow this program to make awards every semester.

Hopefully both students and education administrators will take advantage of this program.

ABOUT US

ProComSol, Ltd was founded in 2005 and has become the leading provider of technically advanced, cost-effective communication solutions to the HART marketplace. The president, Jeffrey Dobos, has over 20 years' experience developing products with HART technology. The company also designs and manufactures RS232, USB, and Bluetooth HART modems. In combination with the modems, the company's DevCom Smart Communicator Software and Apps are used to convert any PC, Tablet, or Smartphone (Windows, iOS, and Android) into a full featured, DD based HART Communicator.
