**FOR IMMEDIATE RELEASE**

**ProComSol HART and Foundation Fieldbus (FF) Communicator kit for Android**

*LAKEWOOD, Ohio USA – February 19, 2024 – ProComSol, Ltd ([www.procomsol.com](http://www.procomsol.com)) today announced the release of its new Android based HART and Foundation Fieldbus (FF) Communicator kit. The kit includes all the items needed for a complete HART and FF Communicator including an Android tablet, HART and FF modem, Communicator Apps, and carrying/storage case. The Communicator Apps use the Device Descriptor (DD) for the connected HART or FF device so the user has full access to every Parameter and Method in the instrument. According to Jeffrey Dobos, President of ProComSol, Ltd, “The TAB-DROID-HART-FF-MOBI Communicator Kit offers an alternative to the traditional high cost HART and FF Communicator. With a powerful, lightweight, multifunction Android device utilizing a modern App user interface, the user has quick and easy access to the HART and FF instrument data. The tablet can also be loaded with Apps for other technician tasks, reducing hardware costs and making the technician even more efficient.”*

The Android Apps, DevComDroid for HART and DevComFF.Droid for FF, in combination with the Softing mobiLink multi-protocol communicator (our PN: MOBI-FF), is a full functioned communicator. The entire DD Library for HART and FF devices from the FieldComm Group is included. New DD’s can be added very easily by the user. A communicator that uses DD’s can perform full configurations of Valves, Multi-Variable devices, and complex devices such as Radar Level and Coriolis Flow meters.

The communicator Apps allow the user to view and edit device parameters and even save all the device parameters as a PDF file. The PDF file can then be shared with anyone in the world via the mobile network connections available in an Android device. Saving and sharing device configuration documentation is now faster and more convenient.

Tablet kit versions for Hazardous Areas are also available.

#### ABOUT US

ProComSol, Ltd was founded in 2005 and has become the leading provider of technically advanced, cost-effective communication solutions to the process automation marketplace. The president, Jeffrey Dobos, has 24+ years' experience developing products with HART technology. The company also designs and manufactures RS232, USB, and Bluetooth HART modems. In combination with the modems, the company's DevCom and DevComFF Communicator App family is used to convert a PC, Tablet, or Smartphone into a full featured, DD based HART or FF Communicator. Android, iOS, and Windows are supported.
